

FlagPole Banners™

INSTRUCTIONS

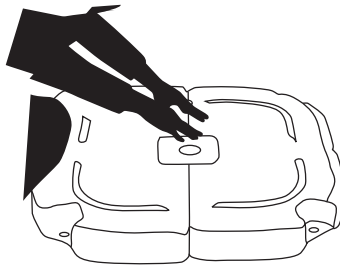

- A - Base
- B - Square Connector
- C - Mast holder
- D - Base Collar
- E - Horizontal Top Bar
- F - Short Screw
- G - Lg Ring (Vertical Bar)
- H - Sm Ring (Horizontal Bar)

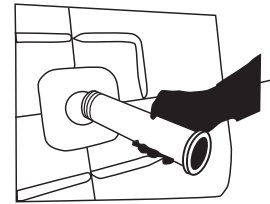

Assemble The Base

Unhinge the two sides of the plastic water tank, and lay it flat on the ground.

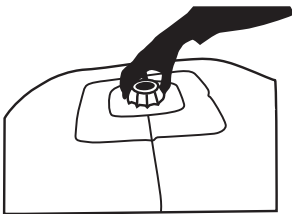

Place the top and bottom square connectors in the center of the base.

Insert the mast holder, from the bottom of the base, with the threads facing up.

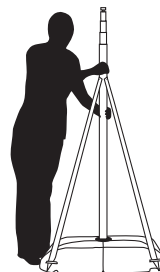

Attach The Mast

Secure the mast holder with the collar by screwing on, until hand tight.

Place the base in the desired location and fill it with water or sand.

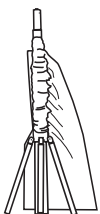

Place the mast into the center hole and attach each of the four leg supports into each of their corresponding corner holes.

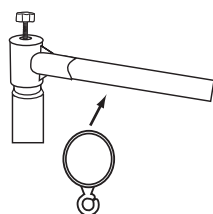

Secure the leg supports by pushing the locking plastic bracket into position.

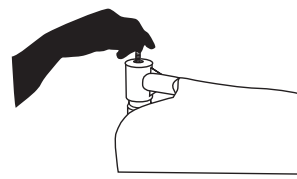

Attach The Graphic

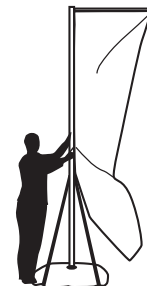

Secure the long side of the banner to the mast with the large rings.

Secure the top of the banner "short side", to the horizontal bar with the small rings.

Secure the horizontal bar to the mast, by screwing the short screw into the top of the mast.

Lift the mast, one section at a time, making sure that each section clicks into position.
